SUMMARY

Technical Writer with 5+ years of experience creating and maintaining technical documentation for B2B software products. Experienced in working closely with developers and subject-matter experts to gather, clarify, validate, and structure complex technical information.

My experience includes product and functionality documentation, API specifications, user guides, tutorials, how-to instructions, troubleshooting procedures, flow diagrams, and technical glossaries. I work with Git-based documentation workflows, Markdown, Docs-as-Code, Confluence, GitBook, Antora, and Hugo.

My background in customer support and project management also gives me a strong user-oriented perspective and experience translating technical information into clear, practical instructions.

I also have a background in translation and philology, with professional experience working across English, German, Ukrainian, and Russian. This has strengthened my attention to terminology, consistency, and clear communication.

I'm currently looking for a Technical Writer role where I can contribute to developer-facing and product documentation for software products.

CORE SKILLS

Technical Documentation · Technical Writing · Information Architecture · Requirements & Information Analysis · Confluence · Jira · Git · Markdown · AsciiDoctor · Docs-as-Code · Flow Diagrams · SDLC · API Documentation & Testing · Basic Code Implementation · Technical Troubleshooting · JSDoc · TypeDoc · Swagger · RapiDoc · GitBook · Antora · JSON · CLI · Diataxis · Microsoft Office · GoogleDocs · Localization (EN/DE/RU/UK)

PROFESSIONAL EXPERIENCE

Technical Writer | Zone 3000 Ltd. (Namecheap and Spaceship projects)

Jul 2019 – Dec 2024 · Hybrid

- Created and maintained developer-facing documentation for B2B software products, collaborating with developers and subject-matter experts to gather, clarify, and validate technical information
- Documented APIs, product functionality, glossaries, workflows, tutorials, how-to guides, and troubleshooting procedures, translating complex technical concepts into clear, structured, task-oriented documentation
- Created flow diagrams and structured documentation to explain complex processes and workflows, while maintaining documentation architecture, information structure, terminology, and consistency across product areas
- Worked in Git-based documentation workflows, reviewing documentation with developers and subject-matter experts to ensure technical accuracy, clarity, and consistency
- Created and maintained documentation using GitBook and Antora (Markdown-based and AsciiDoctor-based content), and API documentation using JSDoc, TypeDoc, Swagger, and RapiDoc
- Tested product functionality via API calls and reproduced basic implementation code (e.g., React widgets) to verify accuracy and completeness of technical documentation
- Maintained internal team documentation in Confluence, keeping process and product knowledge organized and up to date

Customer Support Representative | Zone 3000 Ltd. (Namecheap project)

Mar 2015 – Dec 2016 · On-site

- Resolved customer complaints and technical issues via chat and ticketing systems for website and email hosting
- Assisted customers with DNS, email client, FTP, and SSH configuration
- Created customer-facing documentation and how-to guides on hosting, email, DNS, and related services for non-technical users
- Supported minor website coding issue resolution for non-technical customers

Account Manager / Project Manager | Under NDA (ConnectyCube project)

Jun 2018 – Jun 2019 · On-site

- Supported customers implementing real-time communication solutions, including messaging, voice/video calls, and push notifications; provided onboarding and technical documentation
- Managed client projects and assisted with code implementation

Customer Support Representative / Project Manager | Under NDA (QuickBlox project)

Jan 2017 – May 2018 · Kharkiv, Ukraine · On-site

- Supported customers implementing real-time communication solutions, including messaging, voice/video calls, and push notifications
- Managed client projects and assisted with code implementation

Translator | Gulfstream Translation Agency / AF "Roedl Audit" Ltd. / Martin Translation Agency

2010 – 2015 · Kharkiv, Ukraine · On-site

- Translated texts, documents, and correspondence between English, German, Russian, and Ukrainian
- Translated standardized legal and audit-report documents with fixed, formulaic wording - manually and using Trados (CAT tool) - maintaining terminological and structural consistency across repeated report formats

Independent Craftsperson | Self-employed — @i_murashko_knitwear

Apr 2025 – Present · Kyiv, Ukraine

Independent craft business focused on designing, producing, and selling original handmade knitwear, including customer communication and order management.
